— ABOUT

Full Stack Developer focused on building scalable web applications, APIs and digital products. Founder of Hineni, where I design and develop software solutions from architecture to deployment — using React, Next.js, TypeScript, Node.js and SQL. Currently completing a degree in Systems Analysis and Development while leading Hineni's client projects end to end, from technical scoping to delivery.

— EXPERIENCE

Founder & Full Stack Developer · Hineni

2025 — Present

- Lead full-cycle **software development** for client projects — from requirements gathering and architecture to deployment and post-launch support.
- Design and build **web applications** and **REST APIs** using React, Next.js, TypeScript and Node.js.
- Architect **SQL database** structures (PostgreSQL, MySQL, Supabase) to support production-grade systems.
- Develop institutional websites and **e-commerce platforms** with responsive, performance-focused front ends.
- Manage client relationships and requirements, translating business needs into scalable technical solutions.
- Oversee project delivery end to end, balancing technical execution with client communication and deadlines.

— PROJECTS

MedFlow

Digital Healthcare Platform

Goal: streamline appointment scheduling for healthcare providers. Cross-platform app enabling patients to book appointments and providers to manage availability, backed by secure authentication and a relational database for scheduling data.

STACK

React Native Node.js SQL Supabase

FEATURES

Authentication Appointment Scheduling

DropHouse

Full Stack E-commerce

Goal: give a small business a fast, sellable online storefront. Full stack platform with integrated Mercado Pago checkout, SEO-optimized product pages and a fully responsive interface for desktop and mobile.

STACK

Next.js TypeScript Node.js SQL Supabase

Mercado Pago

FEATURES

SEO Responsive Design

VivaMart

Marketplace

Goal: build a lightweight marketplace with no framework overhead. Covers product search, cart management and a complete checkout flow — fully responsive across screen sizes.

STACK

Vanilla JavaScript HTML CSS

FEATURES

Search Cart Checkout
